The current issue features a special issue of selected papers from the European Society for Agriculture and Food Ethics' (EURSAFE) 2010 meeting held in Bilbao. It also has two book reviews. The papers were selected by a EURSAFE committee and the authors were asked to revise and expand their papers and resubmit to the guest editors of this special issue. They sent the papers to me and I sent them out for review, then the authors made further revisions. The issue begins with an introduction by the guest editors, Leire Escajedo San-Epifanio and Mickey Gjerris.

The first article is *Shifting Schemes of naturalness*, by P. F. Van Haperen, B. Gremmen, and J. Jacobs. The second article, *Taming the Unruly side of Ethics: overcoming challenges of bottom-up approach to ethics in the areas of climate change and food security*, is by Raymond Anthony.

The next two articles are on fish issues. The third article, *Moral Status of the African Catfish*, is by B. Bovenkerk and F. Meijboom. The fourth article, *Attempt to typologise relations between different words (human, animal, living) based on legal and ethical questions surrounding the status of GM fish*, is by L. Coutellec and I. Doussan.

The fifth article is by De Bakker and H. Dagevos, *Reducing meat consumption: ethical arguments in the context of today's consumer society*. The sixth article is by J. De Tavernier, *Food Citizenship: is there a duty of responsible consumption*.

The last article is by C. Gamborg, K. Millar, and P. Sandøe, *Bioenergy and agricultural land use: examining the framing of the ethical debate*.

I am grateful to the guest editors of this special issue for their valuable contribution in putting this issue together.
