Due to a technical problem during the production process, an unfortunate error occurred within Appendix 1 of the above mentioned article. Regretfully, page 202 has been duplicated causing the data from page 201 to be missing in its entirety. On the following page, the correct reproduction has been published which should be treated as definitive by the reader.

Appendix 1. (Continued).

Species	No of Countries	Coastal	Heath and Scrub	Grassland	Forest	Wetland	Unvegetated	Agriculture	Urban
		coastal sand-dunes and sand beaches cliffs and rocky shores	heath and scrub sclerophyllous scrub phrygana	dry calcareous grasslands and steppes dry siliceous grasslands alpine and subalpine grasslands humid grasslands and tall herb communities mesophile grasslands	broad-leaved deciduous forests coniferous woodland mixed woodland alluvial and very wet forests and brush broad-leaved evergreen woodland	raised bogs blanket bogs water-fringe vegetation fens, transition mires and springs	scree inland cliffs and exposed rocks inland sand-dunes volcanic features	improved grasslands crops orchards, groves and tree plantations tree lines, hedges, small woods, bocage, parkland dehesa	urban parks and large gardens towns, villages, industrial sites fallow land, waste places
