Dear Colleagues,

We are in April, and this academic year will soon be over. Time flies indeed. As we approach the end of spring and go into the summer months (cold months in the south hemisphere), it is essential that we start planning ahead about what is next for JINT.

Obviously, quality-quality-quality is top priority. Divergence and global coverage is next. As such, I encourage all of you to find who's who and who's doing what in countries not well represented publication-wise. I encourage all of you, readers and authors, editorial board members to identify key people in those countries who will be able to submit an article about research in robotics, automation and unmanned systems conducted in their respective countries. Information is power; exposure creates opportunities, collaboration and many other things, once people find out they have common interests.

So, go ahead, take the initiative, investigate, and make it happen. In the mean time, enjoy the issue.

Kimon P. Valavanis
