Dear Colleagues

We are working diligently in revising the look of our journal. This will be the second time after the first ‘revision’ that took place five years ago. One may ask why this is done. Well, I wish I had a very convincing answer. ‘Looks’ do not improve quality – this is certain. ‘Journal looks’ do not improve first impressions (this may not be true in other areas....). On the other hand, a more appealing cover, a different color, a different layout may give the ‘impression’ of ‘something new’. I, personally, feel that a new cover may capture current advances in our field, give a new dimension to the journal, and motivate potential authors to consider submitting papers. A different paper layout may make published papers easier to read – who knows. That is all. I ran out of ‘reasons why we do this’, but the fact is that we are considering it and you will see the results soon. You will be the judge.

Enjoy the issue.
