Dear Colleagues,

As we move well into the 2015 calendar year, I am sure you must have noticed that a few ‘changes’ are already in place in JINT. To begin with, during this year, we are publishing several special issues that were launched and planned in 2013/2014. We also decided to put emphasis in survey papers, but in very selective topics of interest; however, only one survey paper will be included in a single issue. The aim of such survey papers is to serve as ‘reference material’ for researchers and scientists who wish to conduct in depth research in the specific area.

We always try to make things better for the readers and to give them the most ‘proper’ and informative tool they need to keep up with the rapid advances in robotics and automation.

Enjoy the issue.

Kimon P. Valavanis
