Dear Colleagues,

We have reached the last quarter of 2015—time flies. For the Springer team and the Editorial Board, this is the time of finalizing implementation of new ideas for 2016. We constantly think about improving JINT and making it more appealing and informative. Effective with the first issue of 2016, author bios will be included in each published paper. This is the least we can do for the readers and the authors. In addition, we will continue classifying articles as full, short or survey papers.

We also witness a gradual shift towards ‘unmanned systems’ contributions, which is natural considering

challenges and research opportunities this field offers. We monitor such shifts and we try to capitalize on opportunities they may offer to increase our journal’s visibility without impacting quality.

We welcome your input and feedback and look forward to serving you.

Kimon P. Valavanis
