The description of the third model provided on page 255 under the section ‘Statistical Analyses’ is incorrect. The correct sentence is provided below.

“The third model (Brooks et al. 2006) comprised of two factors with one factor loading on items associated with depression (fatigue, loss of energy, hopelessness, sad, so sad, worthlessness), whilst the other factor loading on items associated with anxiety (nervous, so nervous, restless/fidgety, so restless).”

Additionally, the path diagram for Model 3 in Figure 1 is incorrect. The correct figure is provided below.
