Erratum

© Springer Science + Business Media, Inc. 2006

The Publisher regrets an error that occurred in Journal of Combinatorial Optimization, Volume 10, Number 3, “On Split-Coloring Problems” by T. Ekim and D. de Werra, pp. 211–225.

In the original article, fig. 5 showing an example of split-coloring of a cactus did not appear correctly. Here is the corrected form where the cactus G in fig. 1(a) is split-colored by two colors in fig. 1(c). As already mentioned in the article, even cycles in G are not taken into account while moving to the auxiliary graph G' since they are trivially 2-split-colored by two stable sets.
