George Sell

May 29, 2015 marks a very sad date in the history of the *Journal of Dynamics and Differential Equations* (JDDE). On this day, its founder, Professor George R. Sell, passed away in Minneapolis, after an accident and a three weeks stay in the hospital.

George pioneered important areas of modern dynamics, ranging from the study of non-autonomous equations and skew-product flows, to inertial manifolds and hydrodynamics. In order to enhance and encourage research in the field of dynamics, George founded JDDE in 1989 and served as its Editor in Chief until 2004. In 2004 he invited the two of us to join him as Co-Editors in Chief. Over more than 25 years, George devoted his energy and time for promoting JDDE and attracting high quality research papers. We are deeply grateful to George for his dedication and tireless work for JDDE.

He will be greatly missed and forever remembered by many of us, including the authors, readers, and editors of JDDE.

Together with the editorial board, we intend to carry on his spirit of professionalism and devotion to the journal. George will always be with us as well as with the journal.

Geneviève Raugel and Yingfei Yi
Co-Editors in Chief
