This paper has been retracted. The authors of this article have realized some serious mistakes in Monte Carlo simulations. Therefore, APEX reactor described in this paper is a wrong model. So, Table 3, Figs. 8–12 and performance

evaluation of reactor (in Conclusions) were produced by incorrect simulation results. Therefore, the authors would like to retract their article “The Evaluation of Reactor Performance by using Flibe and Flinabe Molten Salts in the APEX Hybrid Reactor.” The authors apologize to the readers, reviewers and editors of the Journal of Fusion Energy for publication of incorrect data.

The online version of the original article can be found under doi:[10.1007/s10894-011-9441-0](https://doi.org/10.1007/s10894-011-9441-0).
