This special issue contains a selective collection of carefully refereed papers based on talks presented at The Fourth International Conference on Optimization, Simulation and Control held during July 1–4, 2013, in Ulaanbaatar, Mongolia.

The conference was endorsed by the National University of Mongolia, the Mongolian University of Science and Technology, the University of Versailles Saint-Quentin-en-Yvelines and the Center for Applied Optimization at the University of Florida. We would like to take this opportunity to thank the sponsors, the Commission for Developing Countries of the International Mathematical Union and the Abdus Salam International Centre for Theoretical Physics, the authors of the papers, the anonymous referees, and Springer, for making the publication of this issue possible.
