Erratum to: J Immigrant Minority Health DOI 10.1007/s10903-012-9584-8

In the Results section, the following is incorrect:

Males represented 59% of the total MACI sample and were underrepresented in Cluster 1 (46%) and overrepresented in Cluster 3 (67%) 57% of Cluster 3 participants were male. Females made up 41% of the total sample and were underrepresented in Cluster 2 (32%) and overrepresented in Cluster 3 (53%) ($\chi^2 = 7.33(2)$, $p = .026$).

The corrected text should read:

Males represented 32.4% of the total MACI sample and were underrepresented in Cluster 1 (23.5%) and overrepresented in Cluster 3 (38.7%). Females made up 67.6% of the total sample and were underrepresented in Cluster 2 (30%) and overrepresented in Cluster 1 (76.4%) ($\chi^2 = 4.51(1) = .034$).

In Table 2, in the column titled ‘Tukey HSD Comparison’, the third row reflecting POSIT Mental Health Scale comparison is incorrect: $2 > 3 > 1$ and must be replaced by $2 > 1 > 3$.
