Erratum to: J Mammal Evol DOI 10.1007/s10914-012-9195-0

The original version of this article unfortunately contained mistakes, due to a rearrangement of two figures that was not followed by a modification of the captions.

Figure 5: The M4 (Da-b) was initially in the **H** position. When moved to **D** position, the captions should have been moved one rank forward. Therefore, the captions should be corrected by the following:

D IRSNB-M-2043 (DIIC-1118-RS), right M4; **E** IRSNB-M-2039 (DIIC-1229-RS), right M2; **F** IRSNB-M-2040 (DIIC-134-S), left M2; **G** IRSNB-M-2041 (DIIC-2031-RS), left M3; **H** IRSNB-M-2042 (DIIC-1331-RS), left M3.

Figure 7: inversion of **e** and **d**, captions should be corrected by the following:

d MNHN-RZN-28, right m2–4 (reversed); **e** MNHN-RZN-31, left m2–3

Consequent to these two figure rearrangements, the text should be corrected in three places:

1) just under Figure 6, the sentence “In some specimens, the paracone is as tall as the metacone (e.g., IRSNB-M-2042, Fig. 5g).” should be corrected as follows:

“In some specimens, the paracone is as tall as the metacone (e.g., IRSNB-M-2041, Fig. 5g).”

2) again under Figure 6, the sentence “...blistered with a strong angulation of the labial part of the crown (e.g., IRSNB-M-2041, Fig. 5f, or...)” should be corrected as follows:

“...blistered with a strong angulation of the labial part of the crown (e.g., IRSNB-M-2040, Fig. 5f, or...)”

3) in the paragraph describing the Study Of the Morphological Variability, the sentence “Two specimens exhibit a large stylar area, with a paracone that is as tall as the metacone (Fig. 5f–g).” should be corrected as follows:

“Two specimens exhibit a large stylar area, with a paracone that is as tall as the metacone (Fig. 5g–h).”

Moreover, two typing errors remained in the text and must be corrected by the following:

- Abstract, line 11: “heperotheriid lineages” (instead of “hepetotheriid lineages”)

- Page 11, line 6: “*A. brabantense*” (instead of “*A. brabatense*”)
