1. On page 1193, in the next to last line of the first paragraph of Sect. 9, the equation should read $\beta < 4\pi/3 = (2/3\sqrt{3})\beta_c$.
2. In the following equations the quantity $\varkappa$ should be replaced by $1/\varkappa$: (A.8), the equation $f(y(t)) = \text{sn}(\varkappa t - F(\frac{1}{k}, k), k)$ directly above (A.9), (A.9), and (A.10).
3. In the first paragraph of the proof of Remark 5.1(c) (Appendix B, page 1202) the two inequalities on lines 1 and 3, $d\tau_K/dK > 0$ and $d\tau_{K(a)}/da > 0$, respectively, should be

reversed: $d\tau_K/dK < 0$ and $d\tau_{K(a)}/da < 0$. Moreover in equations (B.6) and (B.8) the left hand sides should read $-d\tau_K/da$ and the overall factor of 4 on the right hand sides should be replaced by 2.
