The publisher apologizes for the following errors that appeared in the online article.

The reference year for National Research Council should be 1988 (not 1998). This appears in the reference section and on line six under Sect. 4 “Public and private genomics in mortal combat”.

The Nelson (2006) reference is incorrect. The correct reference is:

Nelson, R. R. (2004). The market economy and the science commons. *Research Policy*, 33, 455–471.
