I write to dissociate myself from the above paper on which I have been named as a co-author without either my knowledge or my permission. The latter would not have been given had I been approached by the corresponding author, N. Kumar (Department of Environment Studies, North-Eastern Hill University, Shillong, Meghalaya, India). For the record, my published work (2007–2011) arising from the UK NERC ‘Depleted Uranium in the Environment’ Programme (2005–2008) is listed below [1–5].
