Erratum to: J Therm Anal Calorim
DOI 10.1007/s10973-014-4146-z

1. Page 2: The reaction equation in “Experimental” section should be replaced with the new reaction equation given below.
2. Page 2: The existing sentence in lines 14–18 of “FTIR

analysis” section, “The C=O stretch of CH₃CONH gives its peak at 1,672 cm^{−1}, whereas the asymmetric NH bend of NH₃⁺ shows its peak at 1,637 cm^{−1}. All these peaks overlap and produce broad intense envelope.” should be replaced with “The presence of C=N group formed due to reaction of acetamide with L-arginine is confirmed by the peak at 1,672 cm^{−1}”.
