Dear colleagues (All contributors of Journal of Thermal Analysis and Calorimetry),

2017 was an exciting year in the life of our journal and we would like to thank all of you for your contributions as authors, reviewers, consultants as well as regional, associate, honorary and guest Editors. We are grateful to you, because your high-quality work is the guarantee for the success of our journal.

It is a great news that the impact factor for 2016 was 1.953, which is ca. 10% increase compared to the previous year.

Several special issues were published in 2017, which include the traditional green issue where a unique chapter dedicated to Prof. Judith Simon, the honorary Editor-in-Chief and founder of JTAC. We continued our long-term tradition and selected papers presented at international conferences (CEEC-TAC3, AICAT2016, 11Bretszanjder) were published in JTAC in 2017.

The classification of the manuscripts submitted to our journal until October 2017 is presented in Fig. 1. We are very happy that the number of manuscript submitted in 2017 is expected to be around 1800 pieces, which is similar to 2016.

In 2017, the journal established a new international conference series on thermal analysis and calorimetry, the Journal of Thermal Analysis and Calorimetry Conference (JTACC). During the almost five decades of publishing, a global community formed around JTAC, and we wished to

create an opportunity, where our editorial board, authors, reviewers, supporters, and all those who were interested in this wonderful field, could meet personally. As a follow-up of the meeting, selected presentations will be published in JTAC.

We thank everybody very much for participating at the 1st Journal of Thermal Analysis and Calorimetry Conference, which was held together with the 6th V4 (Joint Czech–Hungarian–Polish–Slovakian) Thermoanalytical Conference, in Budapest on June 6–9, 2017.

We had a wonderful time together at the JTACC + V4 conference where 126 plenary invited and contributed lectures and 173 posters were presented. Ca. 300 participants attended the conference from close to 50 countries from all over the world.

At the conference, three awards were handed over. Our traditional JTAC Best reviewer Award was given to Prof. Katalin Mészáros-Szécsényi (University of Novi Sad, Serbia). In addition, we established two new grants, and thus the JTAC Scientific Excellence Award was given to Prof. Jean Rouquerol (emeritus research director of the Centre National de la Recherche Scientifique (CNRS), France), while the JTAC Young Scientist Award to Dr. Omid Mahian (King Mongkut's University of Technology Thonburi, Thailand).

We are pleased to announce the 2nd JTACC conference, which will be held in 2019. It will be a very special meeting as we will celebrate the 50th anniversary of the Journal of Thermal Analysis and Calorimetry. Due to this, the conference will be held in Hungary, where JTAC was founded and where also the first commercial simultaneous TG/DTA device of the world, the famous Derivatograph was developed.

In 2018, we would like to increase further the quality of our journal; hence, we have decided on several changes. The most important is that we completely renew our editorial board, which has been the same for nearly a decade. Up to now, we had associate, regional and honorary editors. From 2018, our editorial board will consist of associate and honorary editors with well-defined roles (e.g., decisive review reports, research and review paper

submission, special influence on shaping both JTAC journal quality and trends in thermal analysis and calorimetry, popularizing JTAC). We will reduce the various deadlines in the editorial process (e.g., reviewer invitation deadline, review report deadline) to please our authors even more by

accelerating editorial speed. From 2018, we will publish only research articles and review papers, while we will not consider short communications.

As a closing remark, we would like to wish all our contributors a very happy and successful new year for 2018.

Imre Miklós Szilágyi
Editor-in-Chief

Alfréd Kállay-Menyhárd
Deputy Editor-in-Chief

Head of Editorial Office

Acknowledgements

The editors of the journal are thankful to the regional editors and members of the associate editors for their work throughout the past year.

We would like to express our special thanks to those referees listed below for their hard work, for the time and expertise they invested to improve the scientific level of the manuscripts. Their work is invaluable in terms of scientific advancement and in providing a constant dynamic forum where all scientists, from all over the world can find a professional team helping, educating and inspiring.
