Erratum to: *Matern Child Health J* (2010) DOI: 10.1007/s10995-010-0635-2

Table 7 has been revised to correct the placement error for the household Federal Poverty Level (FPL) variable reference. In the corrected table, the reference household income level is equal to or below 200% FPL. The odds ratios published in the original article are correct, and thus remain the same in the amended table. The edit made in this table does not change either the results or the discussion sections.

The online version of the original article can be found under doi:[10.1007/s10995-010-0635-2](https://doi.org/10.1007/s10995-010-0635-2).

Table 7 Racial disparity for receipt of healthcare transition among YSHCN from the Southern Region, 2005–2006 National Survey of CSHCN

Effects	Unadjusted OR (95% CI)	Adjusted OR (95% CI)*
Race/ethnicity		
Non-hispanic white	3.45 (2.49–4.76)	2.59 (1.73–3.86)
Non-hispanic black	1.00	1.00
Amount of time in past year condition affected child		
Never	5.37 (3.53–8.16)	3.94 (2.53–6.15)
Sometimes	2.28 (1.50–3.47)	2.13 (1.36–3.35)
Usually	1.09 (0.62–1.90)	1.03 (0.55–1.91)
Always	1.00	1.00
Youth has adequate insurance		
Yes	3.03 (2.37–3.88)	2.52 (1.91–3.32)
No	1.00	1.00
Household highest education level		
<High school	1.00	1.00
High school	3.37 (1.99–5.70)	2.56 (1.33–4.89)
>High school	6.82 (4.25–10.94)	3.02 (1.65–5.54)
Household federal poverty level		
≤200% FPL	1.00	1.00
>200% FPL	3.44 (2.62–4.50)	1.82 (1.31–2.53)

* Final Model included 2,666 observations (89.5% of Southern region study sample)
