The original version of this article unfortunately contained a mistake in equation 9.

The correct version of Eq. 9 is

$$CV-R^2 = 1 - \frac{\sum_{i=1}^n (y_i - \hat{y}_i)^2}{\sum_{i=1}^n (y_i - \bar{y})^2}; \quad \text{where } \bar{y} = \frac{1}{n} \sum_{i=1}^n y_i. \quad (9)$$

Please note that the correct form of the equation was used during statistical computation and so the results remain unchanged.
