DOI 10.1007/s11064-011-0405-6**

This article has been retracted at the request of the Editors-in-Chief Arne Schousboe and Abel Lajtha. The EiCs have noted that there is a replication of figures and text between articles in *Neurochem. Res.* (2011) 36:801–811,

J. Neurosci. Res. (2011) 89:437–447, and *J. Ethnopharmacol.* (2011) 133:1109–1116. The submission of this paper was inconsistent with the *Neurochemical Research* journal policy which states: ‘Submission of a manuscript implies: that the work described has not been published before; [and] that it is not under consideration for publication anywhere else’.

Zhaoxu Zhang and Ruiping Zhao contributed equally to this work.

The online version of the original article can be found under doi:[10.1007/s11064-011-0405-6](https://doi.org/10.1007/s11064-011-0405-6).
