The information in the legend in Fig. 7 in the original publication was incorrect. Figure 7 is shown with the correct legend below.

Fig. 7 Comparative chart of the magnetic attraction force estimated by the method proposed in Sect. 3.1 and that measured by the static measurement. The *solid line* shows the curve derived by the static measurement, and the *dashed line* shows the curve derived by using $k_{lin} = -2.578 \times 10^2 \text{ N/m}$ and $k_{non} = -7.125 \times 10^3 \text{ N/m}^3$
