For completeness in the “References” of the paper it is necessary to add the following reference, because in this reference, some interesting two-sided and multi-point schemes which easily can be transferred in the terms of interval analysis can be found, as well as additional sources for these problems:

Iliev, A., Kyurkchiev, N.: Nontrivial Methods in Numerical Analysis: Selected Topics in Numerical Analysis. LAP LAMBERT Academic Publishing, Saarbrücken (2010).
