Calculation of pigment transition energies in the FMO protein

From simplicity to complexity and back

Erratum to: Photosynth Res DOI 10.1007/s11120-007-9248-z

The legend in the top, left-hand panel in Fig. 6 of the original article was incorrect. The legend for the green line should read 'Fit' (see corrected Fig. 6 on this page).

Fig. 6 Comparison of 4 K absorption (OD), circular dichroism (CD) and linear dichroism (LD) experimental data (Wendling et al. 2002) (circles) with calculations, using the site energies obtained with different methods (Table 2) and a point dipole approximation (Eq. 10, $f = 0.8$)

The online version of the original article can be found under doi:[10.1007/s11120-007-9248-z](https://doi.org/10.1007/s11120-007-9248-z).
