Erratum to: Photosynth Res (2008) 97:141–153
DOI 10.1007/s11120-008-9323-0

On page 147 of the original publication, last paragraph, it is incorrectly stated that PYP has been found so far only in photosynthetic bacteria. Genome sequencing has revealed the presence of PYP genes in various non-photosynthetic bacteria (see for example the review by Van der Horst et al. 2007).
