The original version of this article unfortunately contained a mistake in Table 4. The correct observed mean number of delinquent acts in 8th grade for girls is 0.62 for CTC communities and 0.86 for control communities. The correct observed mean number of delinquent acts in 8th grade for boys is 0.95 for CTC communities and 1.38 for control communities. The adjusted differences between CTC and control communities are statistically significant for both genders as correctly reported in the original version of the article.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s11121-010-0178-1>.
