Erratum to: Qual Life Res (2009) 18:519–526
DOI 10.1007/s11136-009-9457-3

Unfortunately, there were two errors in the original publication.

Table 1, entry for 90% probability of depression and HUI3 emotion should be “L/M” (not L/S).

Table 4, entry for CIDI Short-Form and HUI3 overall should be “−0.02” (not −0.22).

The online version of the original article can be found under doi:[10.1007/s11136-009-9457-3](https://doi.org/10.1007/s11136-009-9457-3).
