Erratum to “J. Horálek et al. (2009), The West Bohemian 2008-Earthquake Swarm: When, Where, What Size and Data, *Stud. Geophys. Geod.*, **53**, 351–358”.

Authors of the article by *Horálek et al. (2009)* apologize for a mistake in the formula for the local magnitude estimation, $M_L = \log A_{Smax} - 2\pi + 2.1 \log R + C - 1.7$, presented on page 355. The correct formula should read:

$$M_L = \log A_{Smax} - \log(2\pi) + 2.1 \log R + C - 1.7.$$

Josef Horálek
