Correction to: Synthese

<https://doi.org/10.1007/s11229-019-02490-5>

Unfortunately there is a typo in section 2.3.1, paragraph 7

“Referring to recent findings from verbal versions of the true belief task that suggest that 4- to 5-year-old children **pass such tasks** not via belief reasoning but simpler heuristics that draw on perceptual access (Fabricius et al. 2010), Fiebich argues that 4- to 5-year-olds are still engaged in cognitively demanding belief reasoning when passing verbal versions of the false belief task.”

Should be

“Referring to recent findings from verbal versions of the true belief task that suggest that 4- to 5-year-old children do not pass **such tasks** not via belief reasoning but simpler heuristics that draw on perceptual access (Fabricius et al. 2010), Fiebich argues that 4- to 5-year-olds are still engaged in cognitively demanding belief reasoning when passing verbal versions of the false belief task.”
