The original version of Appendix 2 unfortunately contained a typo in Eq. 3. The corrected equation for $\ln(\text{dose estimate}) = \ln(\text{therapeutic dose}) \cdot [1 - 0.088(\text{therapeutic INR} - \text{Target INR})]$.

Also, the authors wish to acknowledge the NIH for funding this research via R01 HL097036 and U54 HL112303.
