During the publication process, an error was introduced regarding Table 3. The corrected table appears below:

Table 3 Performance evaluation for different feature set sizes, extracted by using different detector threshold values

Small set with the default threshold, *large* set with lower threshold. Number of features indexed without (SMK-SMK*) and with (ASMK-ASMK*) aggregation are reported. Performance for single (SA) and multiple (MA) assignment. These results are without spatial verification and without QE. Bold values corresponds to the best score per dataset
