### Erratum to: Sport Sci Health DOI 10.1007/s11332-017-0379-0

Unfortunately, caption of Fig. 4 published in the original article was incomplete. The complete caption of Fig. 4 is given below.

The original article has also been updated.

**Fig. 4 a** Differences in topographical 2-D scalp maps of the eight channels at High Alpha (10–11.5 Hz) frequency band: while listening to classical music between the two groups at Fp1 and T3, among the three kinds of music in

dancers group at Fp1 and relating to interaction effect between groups and kinds of music at T3. **b** Differences in topographical 2-D scalp maps of the eight channels at Low Beta (12–15.5 Hz) frequency band: while listening to classical music between the two groups at Fp1, T3 and O1, among the three kinds of music in dancers group at Fp1 and T3 and relating to interaction effect between groups and kinds of music at Fp1, T3 and O1. *Circle* identifies the presence of statistically significant differences after FDR multiple comparison test with  $p$  value set at  $p < 0.05$

The original article was corrected.
