Erratum to: Environ Sci Pollut Res DOI 10.1007/s11356-012-1022-x

We realized that there is an incorrect statement in the first paragraph of the Introduction (pg. 1). It is reported the following sentence:

“Biodynamic (BD) agriculture is a unique organic farming system that, within soil organic matter (SOM) management practices and as an alternative to mineral fertilization **and crop rotation**, aims at improving the chemical, physical, and biological properties of cultivated soils upon application of these organic materials”

Unfortunately, the addition of the words in bold “and crop rotations” has been badly overlooked, since it implies a full contradiction of the whole biodynamic philosophy. The following is the correct sentence:

“Biodynamic (BD) agriculture is a unique organic farming system that, within soil organic matter (SOM) management practices and as an alternative to mineral fertilization aims at improving the chemical, physical, and biological properties of cultivated soils upon application of these organic materials”
