There were some mistakes in Fig. 3a and Table 1 (¹³C NMR chemical shifts of compound 1), please find the correct figure and table below.

Fig. 3 Double quantum filtered correlation spectroscopy (DQF-COSY), selected heteronuclear multiple-bond correlation (HMBC), and selected rotating frame nuclear Overhauser effect (ROE) correlations for compounds 1 (a), 2 (c), 4 (e) and 5 (f), and ¹⁵N HMBC correlations for compounds 1 (b), 2 (d), and 5 (g)
