Retraction:

LI Qiurong, MA Jian, TAN Li, et al. Effect of docosahexaenoic acid on interleukin-2 receptor signaling pathway in lipid rafts, *Sci China Ser C-Life Sci*, 2006, 49(1): 63—72

Editorial Statement Science in China Press

According to our policy on duplicate submissions and with the apology of Dr. LI Qiurong, we hereby announce that the paper of “Effect of docosahexaenoic acid on interleukin-2 receptor signaling pathway in lipid rafts”, authored by LI Qiurong, MA Jian, TAN Li, WANG Chang, LI Ning, LI Yousheng, XU Guowang & LI Ji-eshou, be retracted from Volume 49, No. 1, February 2006 of *Sci China Ser C-Life Sci* on page number 63—72. In fact, the duplicate submissions had been accepted and published in *J. Lipid Res.* (Sep 2005; 46: 1904—1913) and *European Journal of Nutrition* (April 2006, 45(3): 144—151) before its acceptance by *Sci China Ser C-Life Sci*, but the corresponding author did not tell the truth and still signed the Copyright Transform Form of SCP.

Sci China Ser C-Life Sci has long carried out strict policies to stop duplicate submission. Therefore, we decide that *Sci China Ser C-Life Sci* will refuse to accept any submission from the first author and the corresponding author of the above-mentioned paper, Dr. LI Qiurong, for a period of three years (i.e., December 2006—November 2009) as a punishment for his misconduct.

It is our expectation that all co-authors can attest the submitting situation before signing their names at the time of submitting it to *Sci China Ser C-Life Sci*. Following common practices of many international journals, all the co-authors of the paper shall share the associated responsibility and be disciplined according to established rules and procedures of *Sci China Ser C-Life Sci* when any misconduct can be determined. Therefore, we would like to advise all the authors to take the above issue seriously when signing their names.
