**Retraction to: J Gastrointest Surg (2012) Volume 16, Issue 2, pp 427–434
DOI 10.1007/s11605-011-1717-1**

The Editors-in-Chief are retracting this article due to similarities to a previously published work entitled “Incidence, consequences, and risk factors for anastomotic dehiscence after colorectal surgery: a prospective monocentric study” by Nicolas C. Buchs, Pascal Gervaz, Michelle Secic, Pascal Bucher, Béatrice Mugnier-Konrad, and Philippe Morel, which was published in the *International Journal of Colorectal Disease* [(2008) 23; 265–270 DOI: [10.1007/s00384-007-0399-3](https://doi.org/10.1007/s00384-007-0399-3)]. The similarities include text repetition and data and statistics in Dr. Schietroma's Table 5 being similar to Dr. Buchs' Table 3.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s11605-011-1717-1>.
