On page 4 of the original publication, Figure 2 contained incorrect IUSM data for 2005 and 2006. Original and corrected versions of Figure 2 are shown below. The revised version omits 2000 data because the question language varied significantly from the language used 2001 through 2006. The revised version also includes a corrected scale description. We regret these errors, but do not think they substantively change the conclusions of our paper.

Original Figure 2

* Comparable data are not available for 2007 because the question on the Graduate Questionnaire changed in this year.

Corrected Figure 2
