In the November issue of the *Journal of General Internal Medicine*, Mathis et al reported that multiple-choice questions from the American College of Physicians's Medical Knowledge Self-Assessment Program® (MKSAP®) helped improve the Internal Medicine In-Training Examination® (IM-ITE®) scores of residents. The authors of this study note that MKSAP questions comprise copyrighted content that cannot be legally copied or re-used, including in the manner described in this research, unless express permission is provided by the American College of Physicians.
