International symposium on Metal-Matrix Composites

As part of the European Congress on Advanced Materials and Processes (EUROMAT 2015) held at Warsaw on September 20–24, 2015, an international symposium, Metal-Matrix Composites, was organized under the Topic: Composite and Hybrid Materials,” with Prof. Werner Hufenbach of Technical University, Dresden, as the Topic Coordinator. The biennial EUROMAT Series, sponsored by the Federation of European Materials Societies (FEMS), is the premier event in Europe for materials science and technology.

Rajiv Asthana

The MMC symposium provided a forum for the exchange of knowledge, experience, and progress on the latest developments and trends in the field of metal-matrix composites. The main topics covered all aspects of the science, technology, economics, and applications of metal-matrix composites, including, but not limited to, the processing, property characterization, modeling, interface design, and recycling.

This month's issue of the *Journal of Materials Engineering and Performance* includes a special section of selected papers from the MMC Symposium of EUROMAT 2015. We wish to thank all authors for their contribution. We are thankful to Diane Whitelaw, production coordinator, for her excellent support with the preparation of the special issue.
