Fe-Th (Iron-Thorium)

H. Okamoto

The Fe-Th phase diagram in [Massalski2] was redrawn from [1989Pal] and accepted in the assessment of [1993Oka]. [2008Wan] attempted to reproduce this phase diagram by thermodynamic modeling. The result is shown in Fig. 1 and believed to be a better representation of the experimental data of [1989Pal] than the original drawing.
