Unfortunately, the presentation of Eq. (6.10) on page 283 was incorrect. The correct version is given below.

$$G = \frac{V_1}{V_2} = \frac{\pi \cdot \left(\frac{D_B^2 - D_W^2}{2^2} \right) \cdot a_p}{\pi \cdot \left(\frac{D_W}{2} \right)^2 \cdot a_p} = \left(\frac{D_B^2 - D_W^2}{D_W^2} \right) \quad (6.10)$$
