We regret that the published version of this article contained an error in the sixth sentence of the last paragraph in the Discussion section, on page 179. The sentence should read as follows:

“We selected a median sternotomy and cardiopulmonary bypass because the aneurysm was large and the connection from the left atrium to the aneurysm was too wide to allow simple division or catheter-based closure.”

This online version of the original article can be found at <http://dx.doi.org/10.1007/s11748-007-0210-y>.
