The original version of this article unfortunately contained mistakes.

1) The first two sentences of Abstract were missing. The corrected sentences are given below.

A multi-objective optimization model for draft scheduling of hot strip mill was presented, which considers rolling power minimizing, rolling force ratio distribution and good strip shape as the objective functions. A multi-objective differential evolution algorithm based on decomposition (MODE/D) was used to solve this model.

2) An incorrect word existed in the first sentence of Section 4.1. The corrected sentence is given below.

Obtain the related strip set-up items of the process control computer and equipment capacity of the hot strip mill, then perform the multi-objective optimization for draft scheduling by MODE/D to get Pareto-optimal solutions.

3) The title of the 9th column of Table 6 was incorrect. The corrected title is $f_2/10^6$.
