With this issue of CORR, we introduce a new feature: “In Brief.” These one- to two-page articles are intended to provide readers with a quick overview of a focused question or issue. The series will include: Fractures in Brief, Statistics in Brief, Classifications in Brief, and may be expanded to other areas. These articles are not intended to

comprehensively review the literature, but rather to provide the opinion of one individual who is expert in the area. We particularly hope residents will find these useful.
