Erratum to: Clin Orthop Relat Res DOI 10.1007/s11999-012-2599-6

In the Introduction of this article, the abbreviation ROA in the last sentence of the third paragraph is incorrect. It should be RAO, and the sentence should read:

To further reduce the morbidity of the exposure we developed a less-invasive approach for RAO in 2000 which incorporated a smaller skin incision, trochanteric osteotomy, and no detachment of the gluteus medius from the ilium (Table 1).
