Erratum to: Clin Orthop Relat Res (2012) 470:3213–3219 DOI 10.1007/s11999-012-2390-8

In the third paragraph of the *Discussion* section, the patient that had a periprosthetic infection after having a steroid injection 35 days before a THA was mistakenly related to

the study of McIntosh et al. The corrected version should read: The patient from the injected group in the current study who had a PJI had a steroid injection 35 days before the THA (Table 3).

The authors regret this error.
