The LAMP sequence shown in Table 1 in the original publication is not correct. The sequence cloned into

pISGlamp, pelaISGlamp, pTSAlamp and pelaTSAlamp constructs is: **L I P I A V G G A L A G L V L I V L I A Y L I G R K R S H A G Y Q T I**. The updated table should appear as follows.

Table 1 Features of ten plasmids encoding either *ISG* or *nTSA* genes located upstream of the reporter gene *GFP*

Plasmid	Targeting sequence	Cloned sequence	Expected outcome
pISGlamp	Lysosomal-associated membrane protein (lamp)	5' ISG GFP L I P I A V G G A L A G L V L I V L I A Y L I G R K R S H A G Y Q T I 3'	Lysosomes and late endosomes
pelaISGlamp	Adenovirus E1A ER (e1a) + lamp	5' M R Y M I L G L L A A V C S A ISG GFP L I P I A V G G A L A G L V L I V L I A Y L I G R K R S H A G Y Q T I 3'	Lysosomes and late endosomes
pTSAlamp	Lysosomal-associated membrane protein (lamp)	5' TSA GFP L I P I A V G G A L A G L V L I V L I A Y L I G R K R S H A G Y Q T I 3'	Lysosomes and late endosomes
pelaTSAlamp	adenovirus E1A ER (e1a) + lamp	5' M R Y M I L G L L A A V C S A TSA GFP L I P I A V G G A L A G L V L I V L I A Y L I G R K R S H A G Y Q T I 3'	Lysosomes and late endosomes
