Correction to: Theoretical Ecology

<https://doi.org/10.1007/s12080-017-0357-9>

The original published online version of this article unfortunately contained a mistake. On page 2, line 7, in the chapter "The concept of ecosystem engineering as an energy transfer process":

Allogenic engineers are mostly plants and stationary animals like corals, and as such they require different state variables, attributes and behavioural strategies than autogenic engineers which are usually locomotive animals.

Instead, it should be:

Autogenic engineers are mostly plants and stationary animals like corals, and as such they require different state variables, attributes and behavioural strategies than allogenic engineers which are usually locomotive animals.

The online version of the original article can be found at <https://doi.org/10.1007/s12080-017-0357-9>.
