This comprehensive multi authored book has 28 chapters over 322 pages. The book covers common Pediatric neurological problems encountered in office practice. This includes broad layout on topics like developmental delay, autism, febrile seizures, drug resistant epilepsy, neurocysticercosis, neuro metabolic and neuromuscular diseases of children. Each chapter provides an overview of clinically relevant issues pertaining to each topic. The chapters have been contributed by eminent Pediatric Neurologists of India from their vast

experience. The language is kept simple and is well supported by tables and flow charts, where required. This makes the book readerfriendly, especially for the residents. The quality of photographs could have been better and colorful. Sections on Pediatric neuroimaging and approach to neurodegenerative disorders are suggested additions for future editions. Overall, the book is concise and comprehensive and is recommended for practicing pediatricians and pediatric residents.
