Dear Dr. Shukla

Sir, First please accept my high appreciations and congratulations for transforming the IJS into present stage and also getting it indexed. Kudu's to you and your team and please keep it improving further and further.

A child kicks its legs rhythmically through excess, not absence, of life. Because children have abounding vitality, because they are in spirit fierce and free, therefore they want things repeated and unchanged. They always say, Do it again; and the grown-up person does it again until he is nearly dead. For grown-up people are not strong enough to exult in monotony. But perhaps God is strong enough... It is possible that God says every morning, Do it again, to the sun; and every evening,

Do it again, to the moon. It may not be automatic necessity that makes all daisies alike: it may be that God makes every daisy separately, but has never got tired of making them. It may be that He has the eternal appetite of infancy; for we have sinned and grown old, and our Father is younger than we.

We will have to repent in this generation not merely for the hateful words and actions of the bad people, but for the appalling silence of the good people.

Whole world is undergoing evolution and thus the situation looks chaotic but future is and will always be better. I hope you will keep guiding and helping us at ASI and also our journal will someday have high impact factor and achieve world fame.

Best wishes
Long Live ASI.....

Prof. Rama Kant
President ASI
MS, FRCSEd (by Special Election, Ireland), F.R.C.S. (Edinburgh),
